

## Dieter von Holtzbrinck Ventures

### Investing in Europe's most passionate founders

September 2020

Dieter von Holtzbrinck Ventures (DvH Ventures) is a leading early stage investor with offices in Cologne and Vienna. As an independent venture capitalist, we invest in technology companies that challenge entire industries. We are building successful investment clusters including but not limited to the fields of digital health, education or FinTech and will stay hungry for more digital innovations.

We typically start with Seed and Series A investments of up to € 2M and ensure reserves for future rounds. Beside our investment, we support entrepreneurs with our strong entrepreneurial, operational and financing background. In addition and as part of our media-for-equity program, we offer access to the large reach and strong brands of publications like Handelsblatt, WirtschaftsWoche, DIE ZEIT, Apotheken Umschau and others.

Founded in 2014, DvH Ventures today manages different funds and is one of the most ambitious early stage investors in Europe. Managing partners are Peter Richarz and Fabian von Trotha.
